

Architecture diagram files (PNGs)

Raster figures are stored **next to the repository root** `README.md` so Markdown previews can resolve short, ASCII-only paths:

`../../readme-images/`

File	Description
<code>01-system-context.png</code>	System context
<code>02-logical-architecture.png</code>	Logical architecture
<code>04-dfd-level-0.png</code>	DFD Level 0
<code>04-dfd-level-1-main-processes.png</code>	DFD Level 1 — main processes

Keeping a single set of assets under `readme-images/` avoids duplicate binaries. This folder is the canonical location for these four images.
